About Me

Passionate Front End Developer dedicated to crafting intuitive and visually appealing web interfaces. Proficient in modern front-end technologies such as React.js, HTML5, CSS3, and JavaScript. Collaborative team player with a keen eye for design, committed to delivering high-quality code and exceptional user experiences. Committed to continuous learning and staying abreast of industry trends to drive project success.

Professional Experience

Lenovo PCCW Solutions | Associate Developer
May 2023 – Present

Key responsibilities:
- Designed and developed responsive web pages for an internal in-house claim management system using React, with UI/UX designs created in Figma.
- Collaborated closely with designers and back-end developers to implement website features and functionality, fostering a cohesive development environment.
- Ensured the scalability, performance, and maintainability of the front-end codebase while adhering to Agile methodologies for iterative development.
- Used version control systems such as Git to manage the codebase efficiently, ensuring version control and facilitating collaborative development processes.
- Developed an online eForm designed to facilitate communication of project status between Project Manager and Stakeholders using Power Apps.
- Collaborated effectively with multiple associates in script development using Katalon for a streamlined automation testing.

Top Glove | SAP Ariba Intern
Sep 2022 - Jan 2023

Key responsibilities:
- Developed several software bots in Python to automate repetitive processes in SAP ECC and Salesforce Helpdesk website
- Performed technical configuration and testing in Ariba site whenever there are request for adjustment by the users
- Assisted in solving technical issues faced by users while utilizing the Ariba software
